

IBS College offers two new courses

MIRI: IBS College, a quality private institution of higher learning which has produced more than 2,000 diploma and degree graduates in Miri over the last 14 years since its establishment, recently announced its new partnership with UCSI University, Malaysia.

The partnership is an extension of the programme development in which IBS College will offer two new degree programmes: BA (Hon) in Accounting and Finance and BA (Hons) in Business Administration.

The two degrees approved by the Ministry of Higher Education and accredited by the Malaysian Qualifications Agency or MQA under ownership of UCSI University will be offered entirely by IBS at its Miri campus.

These two degrees are among the most popular programmes in UCSI University and have received accreditation and recognition from many international professional bodies including ACCA in the UK.

Subject to approval by the relevant authorities, the two new programmes will commence on January 2013. According to principal of IBS College, Dr Antony Hii, to help students cope with the cost of higher education, IBS College will allocate scholarships and sponsorships to those with good academic results and those in need.

IT'S AGREED: Lim (right) and Hii sealing the agreement.

The college will also help students applying for the two new programmes to get education loans from PTPTN and other financial organisations.

"Both UCSI University and IBS College will work closely to offer these quality degree programmes, and this educational collaboration will help many students in Northern Sarawak and the surrounding regions obtain higher

qualifications in Accounting and Finance, and Business Administration. It also helps the local business industries recruit enhanced and skilful manpower in the future," said Professor Emeritus Dr Lim Koon Ong who is deputy vice-chancellor, Academic Affairs and Research, UCSI University.

IBS College welcomes enquiries and information. Call 085-438666 or visit its website at www.ibs.edu.my.
