

Web-based portal for express service

> The University Placement Express is the result of over 20 years of student placement experience

SINCE 1990, the premier English language centre, ELS Malaysia has steered thousands of its students to further their education in colleges and universities, both locally and abroad.

A franchise of the US-based ELS Language Centres which was established in 1957, ELS Malaysia is known for its various quality student-centred English language programmes. In particular is its flagship programme, the Certified Intensive English Programme (CIEP) which started in 1990.

Over the years, ELS Malaysia's programmes have gained recognition from local colleges, universities and other institutions of higher learning as being a well-structured and comprehensive programme that delivers results. This has resulted in many institutions accepting ELS graduates into their tertiary programmes without a IELTS or TOEFL examination score. These colleges and universities include HELP, INTI, KBU, KDU, Limkokwing, Nilai, SEGi, and UCISI.

There are currently over 25 local institutions that recognise ELS' high academic standards and this figure is on the increase. Additionally, more than 600 colleges, universities and career schools in the US and a sizeable number of universities and polytechnics in the UK, Australia and New Zealand also acknowledge the ELS Proficiency recommendation in place of the IELTS, TOEFL or other standardised examinations for their English language admissions requirement.

ELS Malaysia has constantly complemented its services to its students to make it more than just improving their English language capabilities in preparation for tertiary education. All along, ELS Malaysia has also been providing assistance to its students in college and university applications. Thus, it was only a matter of time that ELS Malaysia eventually develops its own university placement portal.

Called University Placement Express, or UPX, this web-based portal is the result of over 20 years of student placement experience. A complimentary and comprehensive online university application service, UPX allows students to browse, compare and then apply to any of ELS' partner universities and colleges that recognise their ELS qualification.

Students also have access to ELS Course Counsellors to guide them in selecting the programmes that best suit their future aspirations.

With UPX, ELS students have access to pertinent information regarding listed colleges and universities at their fingertips and are thereby able to formulate informed choices regarding their future.

UPX is the first fully-integrated university application

Students come first... ELS takes pride in providing strong support and good service to its students.

web platform that takes students through from the stage of browsing a prospectus, right up to gaining admission into university. ELS Malaysia aims to shorten the bridge and simplify procedures and processes between applicants and institutions of higher learning.

There are just four easy steps for ELS students to take when using the UPX. The first step is to do a Course Search based on academic qualifications, interests, location, budget, and personality traits.

Step two is Course Application, where with a simple click of a button, the application is submitted directly to the chosen institution of higher learning for processing and approval.

Step three is the Course Application Review and Approval which as the title states, the education institution will review the application for approval. The fourth and final step is Approval Notification where the applicant will be notified of the status of his or her application.

With everything carried out and submitted online, the whole process is fast and hassle-free, saving precious time for both parties.
