Name: George Okoe Sowah

ID: 04959156

Supervisor: Inderjits Singh

Second Marker: Chuah Cheng See

Year: Aug 2005

Abstract:

The report for this project was based on my final year project title as name above. The goal simply is using the system to send text messages from university's administrators and lecturers to the student hand phone.

In the preceding chapters I would be report on the rational behind undertaken this project, the procedures and methods, what I did, how I did, problems identifications, solutions system, the analysis, design, implementation and evaluation.
All the phases on the write-up of the project report were represented in chapters as seen below:

bad writing / english

In Chapter 1 Introduction, the focus was on the background of the project, and answers the question why the need for this project and plans of action which taken on the project.

Chapter 2, Analysis, this stage was to ascertain and analyze, problems in the current system, justify business, and proposed a new system.

From Chapter 3, Synthesis, bring in solutions identified earlier on, design of Interfaces and coding to reflect the true state of the new system.

The focus on Chapter 4, Evaluation, highlights the testing of the system, output to expect, pros and cons, and general observation the project.

The project ends on Chapter 5, Conclusions and recommendations, this part summaries the project in a nutshell, and state facts based on the project undertaken, gives enforce my opinions and gives future directions for the project and lastly followed by References and Appendices in that order.

This should be written in Introduction Not Abstract.
