Abstract

Ucsi University aims to develop an application that will help silent student in the learning environment. This application will help encourage non active student in the university to find the courage in participating in tutorial session. This idea of encouraging student will motivate them to concentrate more during tutorial session in the campus as a result of this many more would like to study in the university provided that the University have more interacting session between facilitator and his student. However, mobile application on android OS will be introduce to help boost student courage for effective learning in the environment.
